SUMMARY

Front-End Developer with 1+ year of hands-on experience building responsive, accessible web applications using React, JavaScript, HTML5, and CSS3. Proven ability to deliver performance-optimised UIs and collaborate in agile, cross-functional teams. Seeking a Software Engineer role to leverage full-stack exposure and AI-integrated development skills.

EXPERIENCE

Front-End Developer Intern

Zidio Development (Remote) | May 2026 – Present

- Architected and shipped responsive UI modules for IntellMeet, an AI-powered enterprise collaboration platform, using React and WebRTC; reduced average page load time by ~30% through component-level code-splitting and lazy loading.
- Integrated AI/ML APIs to surface real-time meeting summaries and auto-extract action items, cutting manual note-taking effort for end users by an estimated 40%.
- Collaborated with a 5-member cross-functional team in two-week agile sprints; participated in daily stand-ups, PR code reviews, and CI/CD pipeline workflows on GitHub Actions.
- Ensured WCAG 2.1 accessibility compliance across all front-end components, broadening platform usability for users with disabilities.

Full Stack Developer

Zato, Hyderabad | March 2026 – May 2026

- Built 8+ responsive web pages from Figma designs using vanilla JavaScript, HTML5, CSS3, and Node.js, achieving consistent rendering across Chrome, Firefox, and Safari.
- Developed and maintained RESTful APIs using Node.js and Express, integrating backend services with frontend components to deliver end-to-end feature functionality.
- Diagnosed and resolved 15+ cross-browser UI bugs, improving Lighthouse performance scores from 62 to 85 through asset optimisation and render-blocking resource elimination.
- Wrote unit and integration tests using Jest and Postman, achieving 80%+ code coverage and reducing post-deployment bugs by ~30%.
- Refactored legacy CSS to a modular BEM architecture, reducing stylesheet size by 25% and accelerating onboarding time for new team members.

Business Development Intern

Topgrade Innovation, Bengaluru | Dec 2025 – March 2026

- Conducted market research across 3 industry verticals and managed 20+ client interactions per week, translating technical features into business value propositions that contributed to a 15% increase in qualified leads.

PROJECTS

IntellMeet – AI-Powered Enterprise Meeting & Collaboration Platform

React, JavaScript, WebRTC, Socket.IO, OpenAI APIs, GitHub Actions

- Architected real-time video conferencing using WebRTC + Socket.IO supporting 50 concurrent users at <200 ms latency; integrated Whisper + GPT APIs to auto-generate structured meeting summaries within 10 seconds of session end.
- Built NLP-based action-item extraction engine from meeting transcripts, reducing missed follow-ups by ~35%; optimised React components via code-splitting, cutting page load time by ~30%.

Audio-to-Text Sign Language Conversion System

Python, SpeechRecognition, NLP, MediaPipe

- Built an end-to-end pipeline converting spoken audio to ASL gloss notation via Google SpeechRecognition API, achieving 91% word accuracy on a 500-sentence test set; deployed as a browser extension used by 15 beta testers.

Blockchain-Based Voting System

Solidity, Ethereum, Web3.js, React

- Implemented a tamper-proof Solidity voting contract on Ethereum testnet with cryptographic hashing for full ballot immutability; built a React + Web3.js frontend enabling real-time vote casting and verification.

Vehicle Speed Detection System

Python, OpenCV, NumPy

- Engineered a real-time vehicle speed estimation pipeline using OpenCV background subtraction and centroid tracking, achieving ±5 km/h accuracy across varied lighting — viable for traffic-violation monitoring without specialised hardware.

SKILLS

Languages	JavaScript (ES6+), Python, HTML5, CSS3, Solidity (basics)
Frameworks & Libraries	React.js, Web3.js, WebRTC, Socket.IO, OpenCV, SpeechRecognition
Tools & Platforms	Git, GitHub Actions, Figma, VS Code, Postman, Chrome DevTools, Jest
Testing	Unit Testing, Integration Testing, API Testing (Postman), Jest, Test Coverage Analysis
Concepts	Responsive Design, REST APIs, Agile/Scrum, BEM, CI/CD, WCAG Accessibility, ATS Optimisation

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

2022 – 2026

Vignan's Nirula Institute of Technology and Science, Guntur

Intermediate (MPC)

2020 – 2022

Narayana Junior College

SSC | 10/10 GPA

2020

Sri Chaitanya School

CERTIFICATIONS

- Purple Technologies – AI/ML Internship Certificate (May 2024 – July 2024)
- AI & ML Internship Certificate (April 2025 – June 2025)
- AI Internship Certificate (Jan 2026 – April 2026)
- Infosys Certified Intern
- Wipro – Java Full Stack Development Internship Certificate
